Trucks

Dump Truck

A Dump truck is a truck used for transporting loose material for construction. It is equipped with an open-box bed, which is hinged at the rear and equipped with hydraulic rams to lift the front.

Water Tanks

Water tanks are used to provide storage of water to use in many applications, drinking water, both plants and livestock, chemical manufacturing, as well as many other uses

Vacuum Truck

A vacuum truck or tanker is a type of tank truck that has a pump and a tank, designed to pneumatically suck liquids, sledges, slurries or mixtures of sand and water without the contact of any mechanical equipment. Vacuum trucks are used to transport the collected material to a treatment or disposal site

Flatbed Trailer

Whether you are hauling construction machinery or materials, one of Apsara flatbed trailers will make your job easier. Our all aluminum construction cargo trailers can withstand the abuse heavy-duty hauling dishes out.

Low Bed Trailer

United offers you semi low bed trailers that are perfectly suitable for heavy transport which is common in construction and industry. These MULTITRAILER low bed trailers are multi-functional, partly due to their excellent maneuverability.

Boom Truck

For lighter lifting, nothing beats the flexibility and reliability of boom truck cranes. Able to travel at highway speeds, boom truck cranes let you get to the jobsite, get set up, and get to work fast.

Diesel Tanker

A tank truck or tanker truck is a motor vehicle designed to carry Liquefied loads, dry bulk cargo or gases on roads.

Civil Equipment

Civil equipments are used in construction industry. We are committed to provide these civil equipments to our clients to complete their job on time. Depending on the application, these equipment will be used in different ways and will help to archive your milestones as scheduled.
